ENGINEERING**

**WE ALWAYS FOCUS ON
PRECISION & ACCURACY**

ABOUT US

United Arab Engineering Company is a trusted name in the field of engineering, construction, and industrial services, recognized for its commitment to quality, reliability, and excellence.

With a focus on delivering comprehensive technical and operational solutions, we cater to diverse industrial and infrastructure sectors across the region.

Our expertise spans a wide range of services including Technical Support, Specialized Manpower Supply, Diesel Supply, Construction Management, Heavy Equipment Rental, General Contracting, and Material Trading.

Each division is driven by experienced professionals and supported by modern technology to ensure precision, efficiency, and cost-effective project execution.

We take pride in our ability to provide end-to-end solutions — from manpower deployment and construction supervision to equipment supply and material sourcing — all designed to meet client-specific requirements and industry standards.

At United Arab Engineering Company, we believe in building lasting partnerships through trust, performance, and innovation. Our mission is to support industrial growth and infrastructure development while maintaining the highest levels of safety, quality, and customer satisfaction.

MISSION AND VISION

MISSION

To deliver high-quality engineering, construction, and industrial services through innovation, technical expertise, and commitment to excellence. We aim to provide reliable solutions, ensuring client satisfaction, safety, and sustainable growth across every project we undertake.

VISION

To be a leading engineering and contracting company in the region, recognized for professionalism, integrity, and technological advancement, driving progress in infrastructure and industrial development.

TECHNICAL SUPPORTING SERVICES (CIVIL, MECHANICAL & ELECTRICAL)

United Arab Engineering Company offers complete technical supporting services across civil, mechanical, and electrical engineering disciplines. Our experienced team of engineers, supervisors, and technicians brings deep expertise and hands-on knowledge to every project, ensuring precision, safety, and efficiency from start to finish. We specialize in providing end-to-end technical assistance for construction, infrastructure, industrial installations, and maintenance works. From structural design support, fabrication, and mechanical assembly to electrical wiring, commissioning, and system integration, our multidisciplinary capabilities allow us to handle projects of varying complexity.

We are committed to using advanced tools, modern methodologies, and quality-driven processes that meet international standards and regulatory requirements. Our team's technical knowledge is backed by a strong commitment to client satisfaction and continuous improvement. Whether supporting on-site operations or managing complete engineering tasks, we ensure reliability and technical excellence. By offering integrated solutions across all disciplines, we help clients optimize performance, reduce downtime, and achieve long-term operational sustainability. United Arab Engineering Company stands as a trusted partner for all technical engineering support needs in the region.

HEAVY EQUIPMENT RENTAL

United Arab Engineering Company provides an extensive range of heavy equipment rental services designed to meet the operational demands of construction, industrial, and infrastructure projects. Our fleet includes excavators, bulldozers, cranes, loaders, graders, and other advanced machinery — all maintained to the highest safety and performance standards. We offer flexible rental terms, including short-term, long-term, and project-based contracts, allowing clients to choose what best fits their operational needs.

Each equipment unit undergoes routine maintenance and inspection by qualified technicians to ensure reliability and minimize downtime. Additionally, we provide experienced operators and on-site support to maximize efficiency and safety during operations. Our rental solutions help clients reduce capital investment, lower maintenance costs, and improve project flexibility without compromising quality or productivity.

We understand that timely access to reliable equipment is crucial to project success; therefore, our logistics and service teams ensure prompt delivery and technical support. United Arab Engineering Company is dedicated to being a dependable partner in equipment rental, offering not just machines but complete operational support to help clients achieve project goals with precision, cost-effectiveness, and confidence.

CALIBRATION AND INSPECTION

United Arab Engineering Company provides reliable and precise Calibration and Inspection Services designed to ensure the accuracy, performance, and safety of industrial equipment and instruments. Our services are vital for maintaining compliance with international quality standards and enhancing operational efficiency across various sectors including oil and gas, construction, manufacturing, and power generation.

We specialize in the calibration of measuring instruments, pressure gauges, temperature sensors, flow meters, and electrical devices, using certified reference equipment and industry-approved procedures. Each calibration process is conducted by qualified technicians in controlled environments to guarantee precise and repeatable results. Our inspection services cover mechanical, electrical, and structural components — ensuring that all equipment and systems meet required safety and performance criteria.

By implementing advanced testing techniques and rigorous documentation, we help clients maintain traceability and ensure regulatory compliance. Regular calibration and inspection not only extend equipment life but also reduce downtime and prevent costly failures.

CONSTRUCTION MANAGEMENT

At United Arab Engineering Company, our construction management services combine experience, innovation, and a deep understanding of engineering principles to deliver projects efficiently and effectively. We manage all aspects of construction — from design coordination, procurement, and site supervision to cost control and quality assurance.

Our dedicated project management team ensures that every project is executed according to schedule, budget, and client expectations.

We take a proactive approach to planning, risk assessment, and resource allocation, enabling smooth workflow and minimizing project delays. Our construction management services cover industrial facilities, infrastructure development, commercial buildings, and specialized installations. By maintaining open communication channels among stakeholders, contractors, and suppliers, we promote transparency and accountability throughout the construction process.

Safety, quality, and sustainability are at the core of our operations. We strictly adhere to local and international safety standards while implementing environmentally responsible practices. Our systematic monitoring and reporting mechanisms keep clients informed at every stage of the project. With United Arab Engineering Company managing your project, you can expect precision execution, timely completion, and superior quality outcomes — ensuring long-term value and performance in every structure we help build.

WHY CHOOSE US ?

Comprehensive Engineering Expertise

We provide complete technical, civil, mechanical, and electrical engineering support under one roof, ensuring efficiency and seamless project execution.

Skilled and Experienced Team

Our workforce consists of highly qualified engineers, technicians, and project managers with extensive industry experience across multiple sectors.

Timely Delivery and Efficiency

We value our clients' time — ensuring all projects, supplies, and services are completed on schedule without compromising quality.

Customer-Centric Approach

We believe in building lasting partnerships through transparent communication, customized solutions, and exceptional after-service support.

Comprehensive Engineering Expertise

We provide complete technical, civil, mechanical, and electrical engineering support under one roof, ensuring efficiency and seamless project execution.

PROJECTS

Wasit Project

Executed comprehensive civil, mechanical, and electrical works, delivering infrastructure and technical support services to enhance operational efficiency and safety at the Wasit Gas Plant facility.

Jizan Project

Provided construction management, equipment supply, and maintenance services for industrial installations, supporting large-scale refinery operations and infrastructure development in the Jizan region.

Jafurah Gas Project

Delivered technical and manpower support for gas processing, pipeline construction, and facility maintenance, contributing to efficient energy production and sustainable operations at Jafurah Gas Field.

PROJECTS

Petro Rabigh Project

Handled mechanical, civil, and electrical works for refinery expansion and maintenance, ensuring quality, safety, and timely completion at the Petro Rabigh petrochemical complex.

Rig Moving Project (Onshore & Offshore)

Managed logistics, heavy equipment, and technical operations for rig relocation, ensuring safe, efficient movement and installation across both onshore and offshore drilling sites.
